

Online Taxicab Service

Our vision is to make taxicab reservation process anywhere in Andhra Pradesh as hassle-free as possible; and our mission is to help our statewide clientele get a taxicab anywhere in Andhra Pradesh from anywhere around the state. We are virtually open 24/7/365.

The OTS Reservation System allows you to choose any taxicab company listed on our system to provide you with the required transportation service. If we determine that the taxicab company of your choice is not readily available to meet your needs, the system will be manipulated overriding your choice to engage a taxicab company that is able and willing to afford you with the required quality service at the time and place you need it. OTS works with well over all taxicab companies statewide to cover multiple areas spanning through all districts of the state and we persistently strive to expand our service coverage area. This Project was done in offline and can also be placed in online to serve the customers.

Modules

The current system has 2 modules:

- Administrator
- Customer

Administrator maintains all the database about the reservation of the cab. He can also maintain the customer details and also manipulate the cab details.

Customer reserves the cab and he can also send and receive mails from administrator.
