How to find the missing number in integer array of 1 to 100?

How to find duplicate number on Integer array in Java?

How to check if array contains a number in Java?

How to find largest and smallest number in unsorted array?

How to find all pairs on integer array whose sum is equal to given number?

How to find repeated numbers in an array if it contains multiple duplicates?

Write a program to remove duplicates from array in Java?

How to sort an array in place using QuickSort algorithm?

Write a program to find intersection of two sorted arrays in Java?

There is an array with every element repeated twice except one. Find that element?

How to find kth smallest element in unsorted array?

How to find kth largest element in unsorted array?

How to find common elements in three sorted array?

How find the first repeating element in an array of integers?

How to find first non-repeating element in array of integers?

How to find top two numbers from an integer array?

How to find the smallest positive integer value that cannot be represented as sum of any subset of a given array?

How to rearrange array in alternating positive and negative number?

How to find if there is a sub array with sum equal to zero?

How to remove duplicates from array in place?

How to remove a given element from array in Java?

**How to merge sorted array?**

How to find sub array with maximum sum in an array of positive and negative number?

How to find sub array with largest product in array of both positive and negative number?

Write a program to find length of longest consecutive sequence in array of integers?

How to find minimum value in a rotated sorted array?

Given an array of size n and a number k, find all elements that appear more than n/k times?

How to reverse array in place in Java?

Difference between array and linked list data structure?

How to check if array contains a duplicate number?

<https://javaconceptoftheday.com/java-array-interview-programs/>

Write a java program to find duplicate elements in an array?

Write a java program to find second largest element in an array of integers?

Write a java program to check the equality of two arrays?

Write a java program to find all pairs of elements in an integer array whose sum is equal to a given number?

Write a java program to find continuous sub array whose sum is equal to a given number?

Write a java program to find the intersection of two arrays?

Write a java program to separate zeros from non-zeros in an integer array?

Write a java program to find all the leaders in an integer array?

Write a java program to find a missing number in an integer array?

Write a java program to convert an array to ArrayList and an ArrayList to array?

Write a java program to count occurrences of each element in an array?

Write a java program to reverse an array without using an additional array?

Write a java program to remove duplicate elements from an array?

Write a java program to find union and intersection of multiple arrays?

Write a java program to find the most frequent element in an array?

**What do you mean by an Array?**

**How to create an Array?**

**Advantages and disadvantages of Array?**

**Can we change the size of an array at run time?**

**Can you declare an array without assigning the size of an array?**

**What is the default value of Array?**

**How to print element of Array?**

**How to compare Two Arrays?**

**How to sort an Array?**

**Can we declare array size as a negative number?**

**When will we get ArrayStoreException?**

**Can we add or delete an element after assigning an array?**

**What is the meaning of anonymous array? Explain with an example?**

**Is there any difference between int[] a and int a[]?**

**There are 2 int type array data type. One is containing 50 elements, and another one is containing 30 elements. Can we assign the array of 50 elements to an array of 30 elements?**

**int a[] = new int[3]{1, 2, 3} – is it a right way to declare arrays in java?**

**How to copy an array into another array?**

**What are “jagged” arrays in java?**

**When ArrayIndexOutOfBoundsException occurs?**

**Can you explain different steps of declaring multidimensional arrays in Java?**

**How do we search a specific element in an array?**

**If you do not initialize an array what will happen?**

**How do we find duplicate elements in an array?**

**Can we use Generics with the array?**

**How to iterate an array in java?**

Where is the memory allocated for arrays in Java?  
Can you tell me the class name of an array in Java?  
“int a[] = new int[3]{1, 2, 3}” – This a legal way of defining the arrays?  
What is the two-dimensional array?  
Do we have 3-dimensional arrays in Java?  
Can we make array volatile in Java?  
What will be the output of below code?  
What is the step to access elements of an array in Java?  
Can you tell me the differences between Array and ArrayList?  
We know that Arrays are objects so why cannot we write strArray.length()?  
How to find the missing element in integer array of 1 to 7?  
How to find the duplicate in an array?  
How to check array contains value or not?  
How to get largest and smallest number in an array?  
How to do the intersection of two sorted arrays?  
How to get top two numbers from an array?  
How to cut or remove an element from the array?  
What is the logic to reverse the array?  
How do you find the second largest element in an array of integers?  
Write a program to sum values of given array.  
How do you separate zeros from non-zeros in an array?  
Write a program to insert an element and in the specific position in the array?  
How to get the index of an array element?  
Can we extend an array after initialization?  
How to fill element (initialize at once) in an array?
